Module SFP Pour Switch IPTV (8314xx), RJ-45

Kit composé de 2 modules émetteur-récepteur bidirectionnels SFP (Small Form-Factor Pluggable) 10/100/1000TX avec connecteur RJ-45 qui offre une option cuivre pour étendre le réseau jusqu'à 100 mètres.

Réf.831505

Art.Nr

ATR-RJ

EAN13

8424450173800

Vous aimerez

- Module SFP
- Câblage structuré 10/100/1000TX
- Pour les connexions jusqu'à 100m
- RJ-45 connecteur

Découvrir

What is a SFP?

The Small Form-Factor Pluggable (SFP) devices are adapters that generate an interface to allow access to an Ethernet signal through Optical Fiber. These devices can be connected to the inputs of different Ethernet and GPON equipment, allowing the transmission/reception of the information by connecting to single-mode or multi-mode fiber or Ethernet cables.

Among the advantages of using SFP modules, we can highlight the reduction of space, lower energy consumption, or the increase of transmission distances.

Which SFP do I need?

Based on the devices to which they are connected, the transmission speed, or the type of cable used, several options are available in the whole range of media converters. The compatibility between the SFPs and the different Ethernet and GPON equipment is described below.
