RF Amplifier

Multiband amplifier with high amplification power for the signals processed in T.OX headends.

Ref.5575

Art.Nr

UAMP44

EAN13

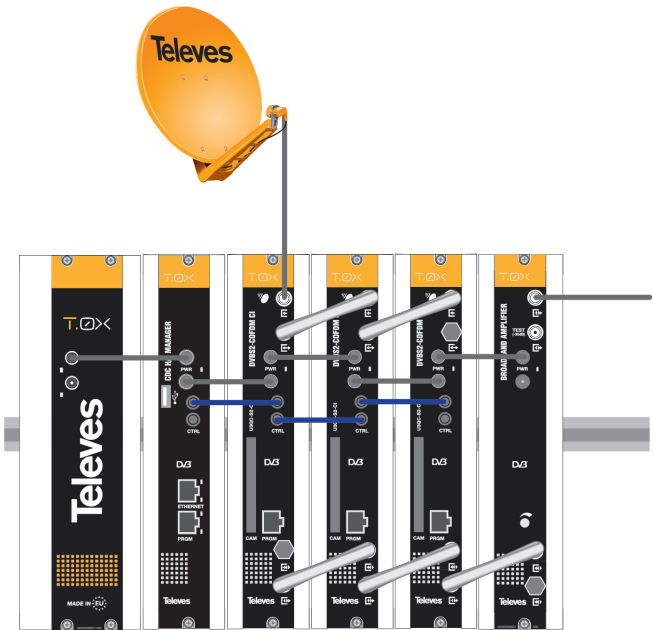

8424450139288

Main features

- Low second and third order distortion, which provide a high output voltage (typical values around 126 dB μ V)
- Equipped with two signal inputs, which allow the mixing of the channels of its own headend with channels coming from other sources
- Equipped with a test output
