

## Option IPTV Analyzer

### H30Evolution / H30Crystal / H30+ & H30D+ meter

```
GND 52° 17:20 [65%]
IPTV
Pkts ..... 3008 pps
Pkt arrival min ..... 325 us
Pkt arrival max ..... 351 us
IP payload BR ..... 32.630 Mbps
UDP payload BR ..... 31.956 Mbps
Media Loss Rate ..... 0 ppm
Lost IP frame ..... 10 frames
```

*Televes reserves the right to modify the product*

Allows the demodulation and analysis of IPTV streams (both Unicast and Multicast), not only through video display but also by displaying the total bitrate and bitrate for each service. The relevant information for each service is already given: SID, VPID, AID, video profile, bit rate for both audio and video.

In addition, this option completes the RF measurements since all this information by service is analysed as well for this type of signals.

For IPTV signals, specific protocol measurements (UDP/RTP) are also analysed, such as UDP format, Media Loss Rate, Lost IP frames.

**Ref.593251**
