Scissors for Kevlar®

Scissors for the cutting of aramid (Kevlar®), a high-resistance synthetic polymer usually present in optical fiber cables to protect the fiber and absorb the mechanical stress.

The scissors provide an easy and precise cut with a smooth finish.

Ref.232310

Art.Nr	OKS
EAN13	8424450170076

Highlights

- Micro-serrated edge: Ease of cutting and smooth finish
- Long service life: The cutting edge stays sharp for many cuts
- Ergonomic, non-slip handle: Offers comfort and secure grip for both right-handed and left-handed users
- Compact and lightweight design: Improves handling and control when cutting

Main features

- Red color
- Made of stainless steel: high wear resistance
