HR (High Rejection) LTE/5G filter 47...694 MHz (Ch.48), "IEC" connector

LTE/5G filters with high rejection against interference from channel 48 up. The built-in female "IEC" connector can be used to plug the filter straight into the equipment to be protected from interference.

Ref.403210

Art.Nr

EAN13

8424450209134

Highlights

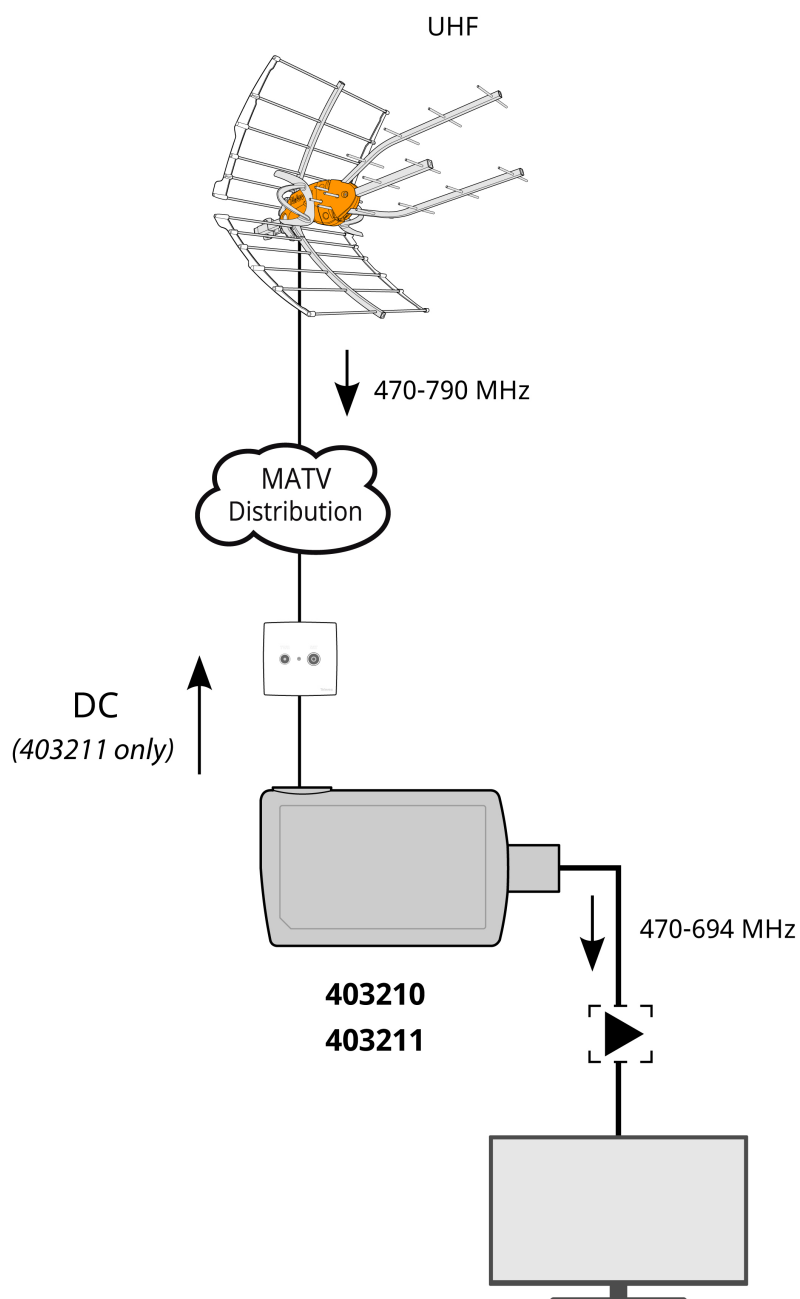

- Plug-in format with integrated connector that adapts to any equipment
- Low insertion losses to avoid any impacts on the distributed signals

Main features

- Indoor installation
- Compact and light-weight size

Application example
