Option Extended Terrestrial Input to 120dBμV H30FLEX / H30Evolution / H30Crystal meter

This option can be installed in the H30 series of handheld meters to extend the input level range in the terrestrial band. Thanks to this function, it is possible to expand the terrestrial spectrum up to 120dBuV.

This option can be obtained for free if the user completes the H30 handheld meter registration process within 30 days of purchase.

Ref.593235

Art.Nr

H30UP-120

EAN13

8424450186824

Highlights

- Compatible with the H30FLEX, H30Evolution and H30Crystal field strength meters
