High-VHF V antenna An entirely different High-VHF antenna

A Yagi antenna for TV reception in High-VHF with an innovative design. Equipped with 4 directors on two vertically stacked grids in an angular aperture, a 4-element reflector and a simple dipole.

Supplied in individual packing.

Ref.106601

Art.Nr

FSA3109

EAN13

8424450182604

Highlights

- Compared to other High-VHF antennas, the High-VHF V antenna has an innovative, eye-catching design, which optimizes the antenna length without losing its electrical features. The result is a compact antenna with outstanding performance and a differentiating design
- Provides high gain in High-VHF, with exceptional rejection characteristics regarding the adjacent bands
- Allows both horizontal and vertical polarization mounting
- The clamp allows the adjustment of the antenna elevation on the vertical axis

Discover

- Built with aluminium (corrosion resistant) for a long service life, and in ABS plastic for high weather resistance
- The mast-mounting system utilizes Zamak to provide sturdiness and stability in adverse weather conditions
- Designed and manufactured in Europe, our products undergo the most stringent quality controls
- The connection box includes a balun for impedance matching

Technical specifications

Bands			Bill	
Frequency range	MHz		174 ... 230	
Channels			5 ... 12	
Gain	dBi		9	
F/B ratio	dB		> 15	
Wind load (@130Km/h)	N		49.9	
Wind load (@150Km/h)	N		68.6	
Mast diameter	in		0.787 ... 1.969
