

Option IPTV Analyzer

H30Evolution / H30Crystal meter

IPTV		
Pkts	3008	pps
Pkt arrival min	325	us
Pkt arrival max	351	us
IP payload BR	32.630	Mbps
UDP payload BR	31.956	Mbps
Media Loss Rate	0	ppm
Lost IP frame	10	frames

Televes reserves the right to modify the product

Allows the demodulation and analysis of IPTV streams (both Unicast and Multicast), not only through video display but also by displaying the total bitrate and bitrate for each service. The relevant information for each service is already given: SID, VPID, AID, video profile, bit rate for both audio and video.

In addition, this option completes the RF measurements since all this information by service is analysed as well for this type of signals.

For IPTV signals, specific protocol measurements (UDP/RTP) are also analysed, such as UDP format, Media Loss Rate, Lost IP frames.
