## **RF** Amplifier

Multiband amplifier with high amplification power for the signals processed in T.0X headends.

Ref.5575

Art.Nr UAMP44

**EAN13** 8424450139288

## **Main features**

- Low second and third order distortion, which provide a high output voltage (typical values around 126 dBµV)
- Equipped with two signal inputs, which allow the mixing of the channels of its own headend with channels coming from other sources
- Equipped with a test output
