## 1/4-wave flexible mobile antenna FM reception

Stainless steel antenna ready for installation for FM reception in a vehicle.

**Ref.6620**

**Art.Nr**

**EAN13**

8424450066201

### Highlights

- Capable of enduring extreme operating conditions and still maintaining its electrical properties. The base wiring (patented) is hermetic, supports a 250 N traction and provides a tightening torque of 12 N/m
- The chrome in the base and rod holder is triple plated
- Rod travel and final fixing with Allen screw
- The structure includes a spring to provide flexibility to the antenna, should it be deflected by an unintended external force

## Technical specifications

---

Frequency range	MHz	68 ... 174
Antenna material		Stainless steel
Spring		Yes
Impedance	$\Omega$	50
SWR		<1,2
Max. power	W	150
